REMARKS

25X1

25X1 1. In March 1954, a total of about 50 trucks, van-like trucks and two-axle trailers, loaded with radio mast sections and signal equipment, were jacked up in the westernmost hangar at Werder airfield.

25X1 A telephone center or a radio installation was located at the eastern end of Phoebener Strasse. Three wires each extended from below the two upper windows of the building over the roof to a cage-like aerial fitted between two masts, about 15 meters high and 15 meters apart, behind the building.

25X1 2. Building No 9 on An Zernsee was being renovated and had to be completed by 10 March. An air force general, who allegedly was to stay at Werder for a short time was to be quartered there.

3. Between 25 March and 6 April, trucks were used by Soviet Air Force commissaries for purchases at the Central Commissary (Base) in Werder:
